# ClassLink Single Sign-On (SSO)

Your existing district ClassLink login can unlock the Aperture System for students, teachers, and staff, straight from the LaunchPad.

Steps to Login:

1. Login to the ClassLink LaunchPad using your existing district login.

2. Click on the Aperture Education app.

3. Land in the Aperture System, fully authenticated.

Aperture Education:
App for educators and administrators

Aperture Education Student: App for students using the Aperture Student Portal

Setup takes approximately one week and ideally **should be completed at the same time as the Student app integration if you use the Aperture Student Portal**. Reach out to your Partnership or Customer Success Team member to ask about if you're eligible for a ClassLink integration.

Note: Educators and students will need to be already rostered in the Aperture System to be able to login through ClassLink.
